How the world shares ideas.

For busy professionals, the Meridian 8314 makes business communications more efficient than ever. The speakerphone helps you save time, by letting you make and receive calls without lifting the handset. Your hands are free for data entry, note taking, or other activities. If you need a moment's privacy from the other party on the line, just press the Handsfree key to mute the call.

You can also create your own phone directory that stays close at hand. Just enter names and numbers into your phone. No more scrambling through phone books—just press the Directory key, scroll, and dial!

The Liquid Crystal Display (LCD) window makes the M8314 easy to use. It shows Directory information, the number dialed, the time and date, and even a call timer—which is especially useful if you bill clients for your time. To ensure easy viewing, just tilt the display window or adjust the Contrast level.

The M8314 offers a host of productivity features. Eight memory keys give you one-touch access to frequently called numbers or features like Call Forwarding. The Redial key keeps track of the last five numbers you dialed. And if you subscribe to a telephone company Voice Mail service, a special light on the M8314 lets you know when a message is waiting*.

Whether you're running a home office, small business, or large operation, you'll find the Meridian 8314 is the perfect communications partner.
